

ENERGY CONSTRUCTION SERVICE

Comprehensive design and construction
Residential complexes, industrial enterprises, engineering systems

We make the complex systematic, and the systematic reliable!

ABOUT COMPANY

Energy Construction Service LLP is a licensed company with over 14 years of experience in design, industrial construction, and engineering works.

- We specialize in comprehensive solutions in industrial energy, gas supply, water supply, and infrastructure.
- Our team brings together over 60 professionals, and our production base ensures the execution of projects of any complexity.
- We operate throughout Kazakhstan, implementing projects from design to commissioning.

14+

Years on market
since 2011

60+

Professionals
in the team

20+

Units of equipment
in our fleet

OUR SERVICES

Design

Technological, civil and urban design of objects of any complexity

Construction and installation works

Comprehensive construction of industrial facilities, residential complexes, engineering networks, roads and infrastructure objects

UAV

Use of unmanned aerial vehicles for high-precision mapping, monitoring and industrial inspection of objects

Surveying works

Engineering-geodetic and geological surveys for design

COMPANY HISTORY

1

2011

Company formation

Start of activities in construction and design

2

2022

Category 2 license

Design activities and engineering surveys

3

2022

Category 2 license

Expansion of construction and installation capabilities

4

2025

Category 1 license

Highest category for CIW, design and surveys

COMPANY RESOURCES

Machinery and equipment

More than 20 units of modern construction equipment for performing work of any complexity

Production base

Own production base for metal structures with a full set of equipment

Project office

More than 10 professionals in the project office for the development of technical documentation

Engineering and technical staff

More than 50 engineering and technical workers with licenses and certificates

OUR PARTNERS

City Akimats
State projects

KazMunayGas
Oil and gas industry

KazTransGas
Gas transport infrastructure

NERO
Smart metering devices

Huawei
Telecommunications

LICENSES AND PERMITS

Construction and installation works

License GSL No. 09301

Issued 05.03.2025

I category

Construction of roads and railways, installation of technological equipment, special works in soils

Design activities

License 22011502

Issued 05.03.2025

I category

Technological, construction and urban design of objects of any complexity

Surveying works

License GSL No. 09302

Issued 20.06.2022

Engineering and geodetic works, topographic surveys, creation of geodetic networks

Production base

Almaty, Turksib district, Krasnogorskaya str., 75

Full production cycle and storage of materials

TOO «Energy Construction Service»

BIN 110740012784 | Almaty, Mamyр-3 microdistrict, building 17/1

OUR EXPERIENCE

More than **170,000 m²** of residential complexes

More than **5,000 km** of engineering networks

More than **55,000 m²** of industrial buildings

PORTFOLIO

CIW

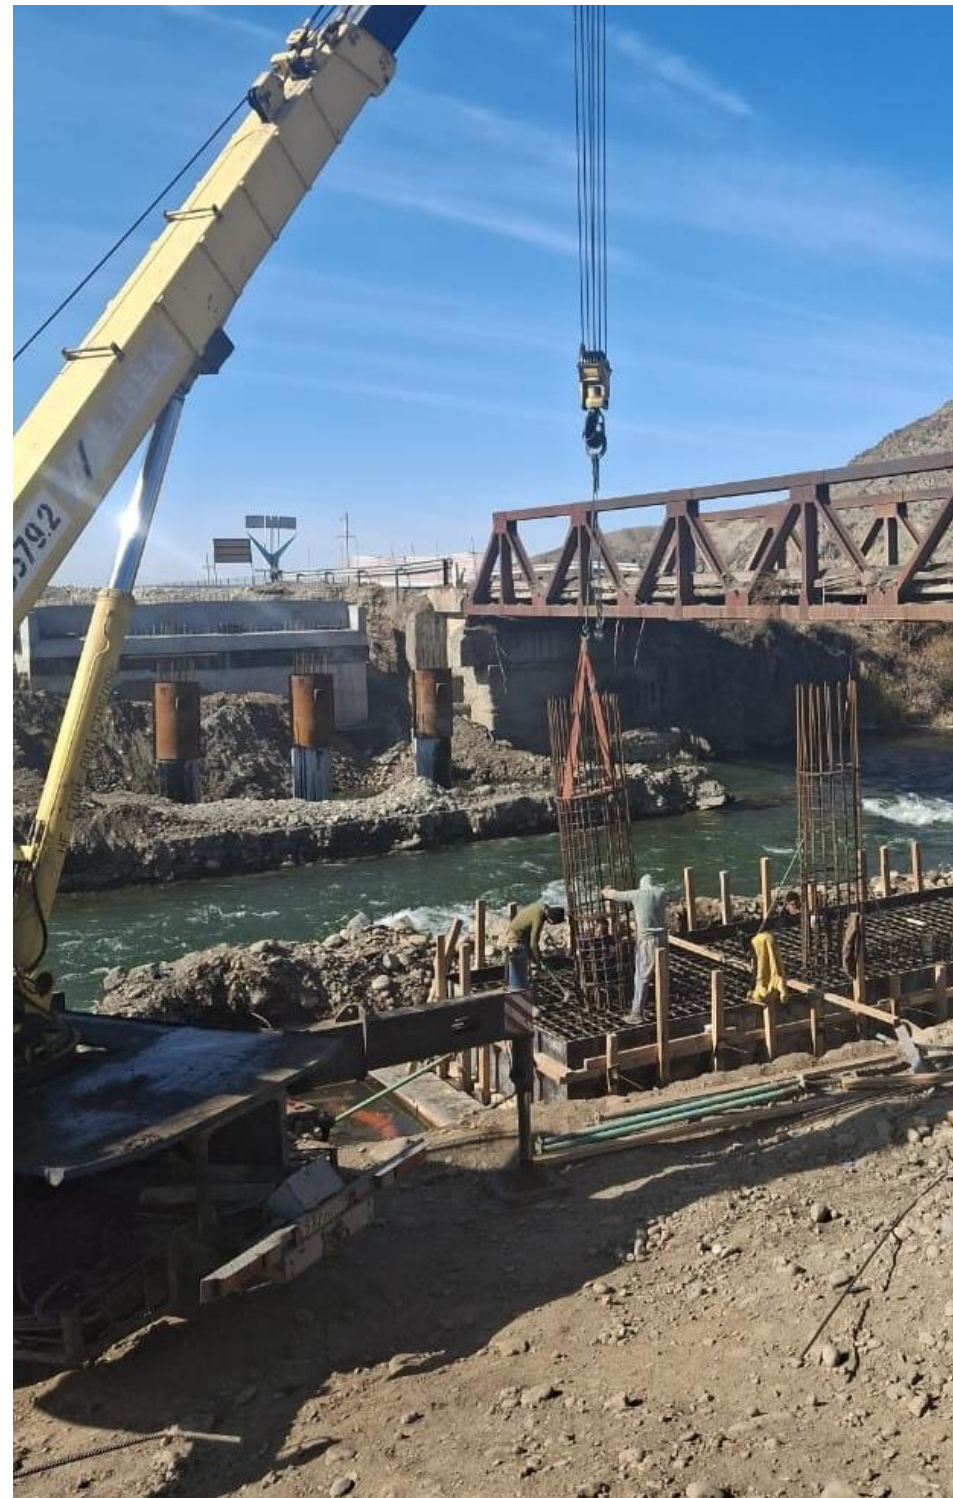

BRIDGE RECONSTRUCTION

LOCATION

Zhetysu Region

PURPOSE

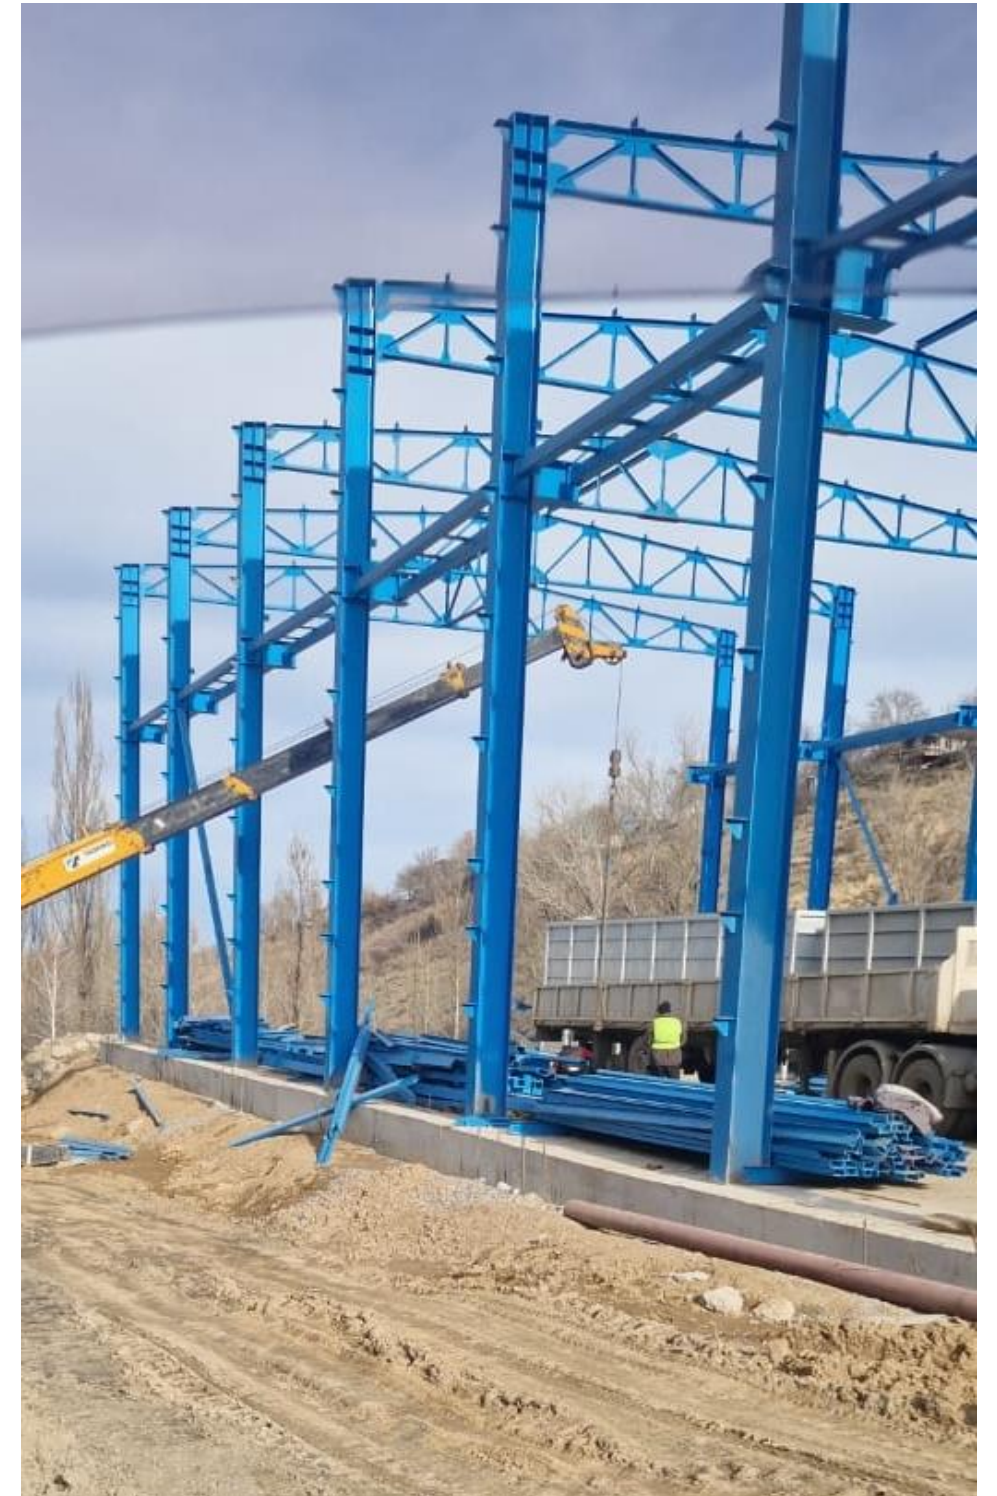

Bridges on regional roads
"Almaty-Ust-Kamenogorsk" -
"Kyzylkaiyn-Lepsy", "Koksu-
Kirovsk" - "Karabulak-Kainarly"

PORTFOLIO

CIW

Experience in implementing large-span structures for industrial and infrastructure facilities (up to 24 m)

PORTFOLIO

CIW

Experience in building modern residential complexes up to 16 stories high

PORTFOLIO

CIW

NERO Technology Center

LOCATION

Almaty

PURPOSE

Construction of a multifunctional complex:

- Fiber-optic cable manufacturing plant – 2,700 m²
- Production complex – 6,000 m²
- Nero Robotics – 5,900 m²
- Training center – 11,600 m²

PORTFOLIO DESIGN

SHYMCITY CLUSTER

LOCATION
Shymkent

AREA
10 ha

PORTFOLIO DESIGN

SCHOOL FOR 300 STUDENTS

LOCATION
East Kazakhstan Region

VOLUME
300 students

PORTFOLIO DESIGN

ECO-FRIENDLY WASTE PROCESSING PLANT

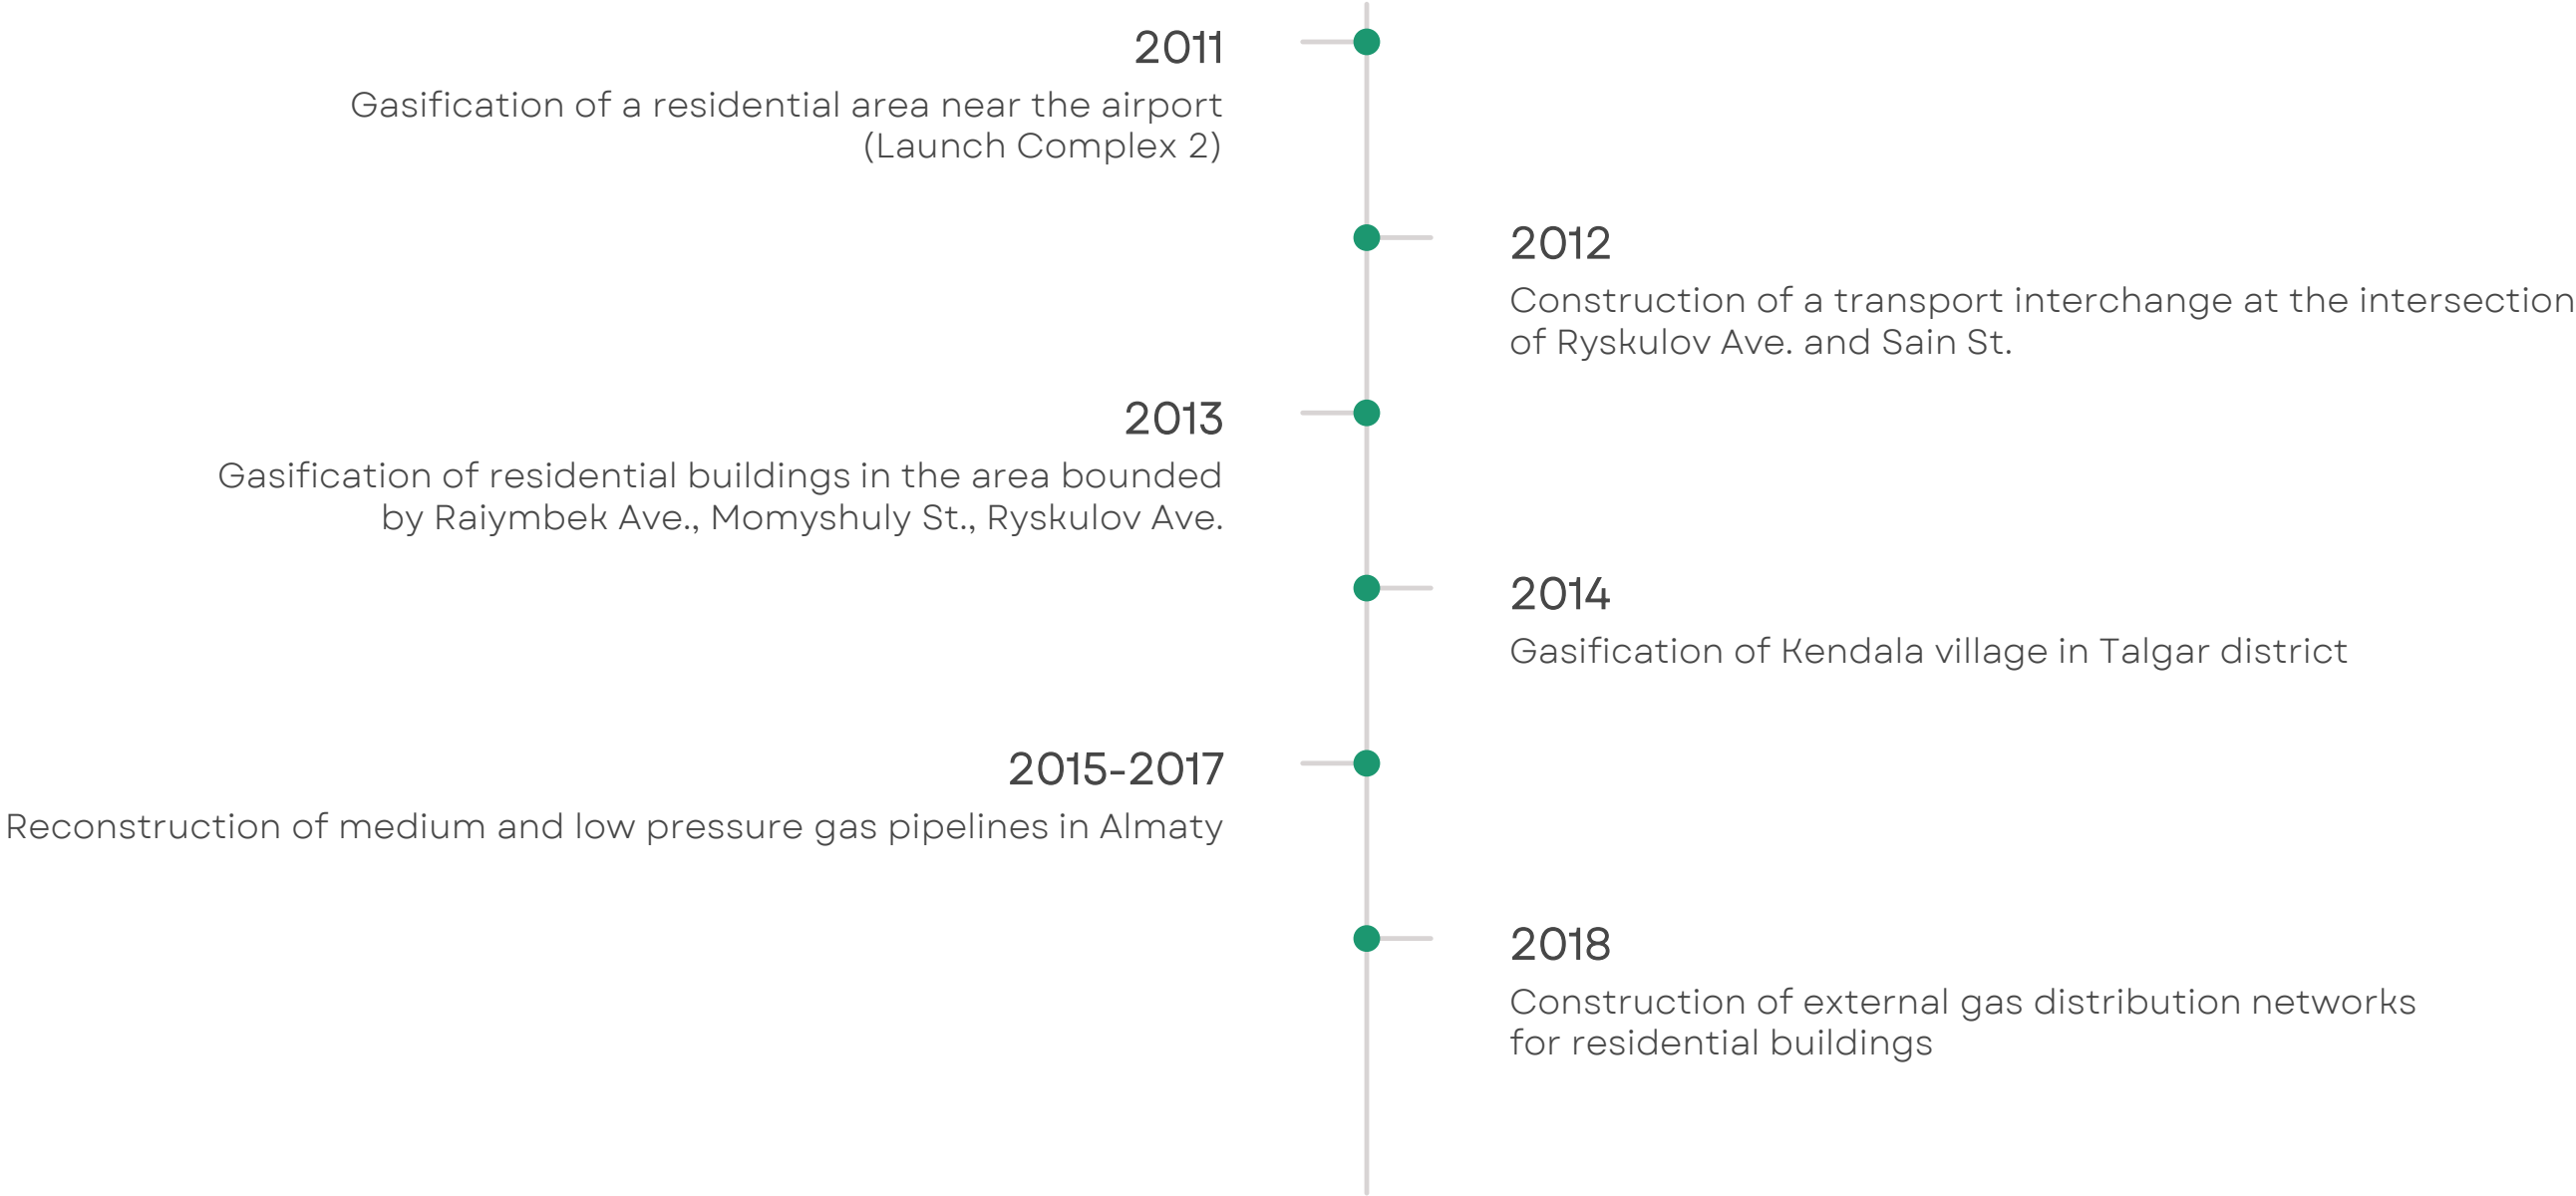

LOCATION
Almaty

CAPACITY
350,000 tons per year

WORK EXPERIENCE: 2011-2018

More than 14 years of successful work in the field of gasification and infrastructure construction

WORK EXPERIENCE: 2019-2023

- 1** 2019
Design of hypermarkets, reconstruction of the Alatau medical center, gasification of the "Helios" residential community
Volume: more than 5 billion tenge
- 2** 2020
Engineering infrastructure in the Turkestan region, sports and entertainment complex, landscaping
Volume: more than 500 million tenge
- 3** 2021
Construction of a school for 1800 students, gas supply for the Presidents Park residential complex
Volume: more than 1,500 million tenge
- 4** 2022
Gasification of the La Verde residential complex, road construction in the Kairat microdistrict, apartment buildings
Volume: more than 1 billion tenge
- 5** 2023
Reconstruction of an administrative building, gasification of Milan 60 multi-apartment residential complex, supply gas pipeline to CHP-2
Volume: more than 3 billion tenge

WORK EXPERIENCE: 2024-2026

2024

- Processing complex with a capacity of 6,000 tons of uranium per year.
- Repair of VL-6kV along the "Bukhara-Ural" Main Gas Pipeline (105 km).
- Supply gas pipeline of high pressure from AGRS to CHP-3.

2025

- Construction of the NERO Technology Center multifunctional complex.
- Reconstruction of bridges on regional roads "Almaty-Ust-Kamenogorsk", "Karabulak-Kaynarly".
- Comprehensive survey of main gas pipeline facilities with a length of 9,700 m.

2026

- Continued implementation of major projects in the fields of energy, infrastructure and construction.
- Integrated support of projects from design to commissioning.

Key projects

Gasification of residential complexes, reconstruction of gas pipelines, infrastructure construction

Work geography

Almaty, Almaty region, Turkestan region, other regions of Kazakhstan

Total volume

More than 10 billion tenge for the entire period of the company's work

LLP "Energy Construction Service" – a reliable partner for implementing projects of any complexity
